We kindly request that you restore access to over half a million books on our platform. Academia.edu uses cookies to personalize content, tailor ads, and enhance user experience. By using our site, you agree to our collection of information through the use of cookies. Please visit our Privacy Policy for more details. Our Teaching & Learning Materials can be downloaded from this page. The missing files will be uploaded soon. Most materials are published in PDF format, which requires a PDF reader like Foxit Reader or Adobe Reader. Your computer likely already has one of these installed. For Educasia's Copyright Policy, please click here. We offer various resources: 1. English Language Learning * Think English series: modules for adult and post-secondary students focusing on standard structural syllabus with functional, purpose-designed skills and learning awareness. * Reading and Writing series: introduces extensive reading (book reviews) and writing (journals). 2. Movie Guides 3. Social Studies 4. Community Development 5. Maths and Science 6. Teaching Resources 7. Other Resources This language learning module covers essential skills for describing people and situations, as well as self-editing techniques using a correction code. It requires approximately 20 hours of class time. The "Narrating Past Events" component focuses on writing biographies, summarizing, and introduces skills in recognizing past events. The "Persuasive Writing" module helps students recognize opinion and persuasive writing, construct clear opinions, and build strong arguments. The "Reading and Comprehension" modules include exciting stories like Skyjack! and Romeo and Juliet: A Play and Film Study Guide, which combine reading, listening, and extension exercises to improve comprehension. The Animal Farm module is a classroom guide that explores the novel's themes and issues through various activities. This module introduces students to fundamental concepts in development, politics, economics, geography, and history, targeting post-secondary learners. The English version follows a pre-intermediate level. Background materials for Southeast Asia focus on early cultures, India's and China's influence, European expansion, colonialism, and independence. Newly independent nations face several issues. The Global Conflict module explores international politics at the turn of the 21st century, covering the Middle East, war on terror, and background material on the Cold War. It requires extensive reading by students and is suitable for those with intermediate-level English skills. The History of Burma book chronicles major events from 2500 BC to present, examining a multi-ethnic perspective. The Systems of Democracy module critically analyzes world political ideologies, comparing advantages and disadvantages in theory and practice. Gender Issues module covers gender roles at work, religion, politics, education, family, and includes a chapter on gender-based violence. Students are encouraged to think about the roles of men and women within their own communities. Environment module focuses on local, regional, and global environmental topics, using a problem-solving approach. It examines local solutions to environmental problems. The teacher's book contains additional study materials for the documentary "An Inconvenient Truth" along with the DVD. The program is structured to deliver a thorough understanding of key environmental concepts and practical skills necessary for maintaining healthy ecosystems. This includes exploration of food chains and Earth's cycles as well as the preservation and challenges facing Myanmar's natural environment. The learning approach emphasizes hands-on experiences, offering students a chance to directly engage with environmental issues. The materials in this section are highly beneficial for design, science, architecture, and engineering fields. They include various textbooks such as Science Basic Chemistry Student's Book and Physics 1: Atoms & Molecules Student's Book, which come with teacher guides. Besides the teaching resources, there is also a book called Teaching Skills that serves both as a textbook for training teachers and a helpful guide for experienced educators who wish to improve their skills. It combines theoretical knowledge of teaching and learning with practical techniques suitable for low-resource settings, such as Myanmar. The taught skills are applicable across various subjects and age groups. World of Knowledge Work Skills English Version: Student's Book, Teacher's Book The World of Knowledge Work Skills English Version: Student's Book, Teacher's Book, is designed to equip learners with practical skills and job readiness. The book has three sections: the first helps prepare for a successful job application, the second focuses on essential work skills such as communication, teamwork, and budgeting, while the third introduces social entrepreneurship. Written at an intermediate level of English.
